

State of Wisconsin Project – P1634T	Location	Type of Work	Summary of Work
	I-94 and I-41/894	Roadway, Bridge, and Ramp Reconstruction, Earth Work, Retaining Walls, Noise Barriers, Freeway Lighting	In 2017, the Zoo Interchange project consists of reconstruction of the I-94 and I-41/894 roadways. Traffic impacts include long-term closures of system ramps in the Zoo Interchange, and long-term closures of numerous service ramps at the Lincoln Avenue, Greenfield Avenue, and WIS 100 interchanges.
			Comments
			Long-term closures of system and service ramps may cause increases in traffic volumes on detour and alternate routes, including 84th Street, WIS 100, National Avenue, and Greenfield Avenue. Traffic signal timings are adjusted to account for the additional traffic. Zoo Interchange project construction on local roadways has been completed with the exception of Fairview Avenue, Curtis Road, Schlinger Avenue, and 100th Street. www.zooic.org

2015 No. 3	Location	Type of Work	Summary of Work
	S. 76th St Bridge over Honey Creek W. Beloit Rd Bridge over Honey Creek	Bridge Deck Repair	The work under this Contract consists concrete bridge surface repair, full depth bridge deck repair, removing concrete masonry bridge deck overlay, installation of concrete masonry overlay (silica fume method), and bridge railing repainting.
			Comments
	Repair deficiencies in the new bridge decks with SikaQuick 2500 patch material and then cover the entire deck with Sikadur 22 Lo-mod polymer overlay. This will insure the proper structural requirements as well as the necessary life cycle of the decking. This product requires about 3 full days with no rain to be installed correctly. This work is starting Monday July 17 th . There will be lane closures over both bridges as the polymer overlay is put in place and as it cures. Cure time will depend upon temperatures and weather.

2017 No. 2	Location	Type of Work	Summary of Work	
	S. 90th St. From W. Becher St. to W. Lincoln Ave. W. Hayes Ave. from S. 84th St. to S. 88th St.	Underground Utility Construction and Roadway Reconstruction	The work under this Contract consists of the reconstruction of both S. 90th St. and W. Hayes Ave. as a 29 or 30 foot wide, 7" concrete pavement, on a 5" dense graded base of crushed stone or crushed concrete; with concrete sidewalk, concrete driveway approaches, landscaping, storm sewer, storm sewer relay, sanitary sewer, sanitary sewer relay, water main, water main relay, building services, utility adjustments and all incidental items.	
			Comments 90th - http://www.westalliswi.gov/DocumentCenter/View/8665 It is expected that the main road will be paved the week of July 17 th . Because work on the road has started, and work on the new streetlights, the old lighting system will be shut off. At this point local traffic on the road will be impossible. As soon as the work allow, residents will be able to access their drives. But, this will most likely happen about one week after the new road is put in place. Hayes - http://www.westalliswi.gov/DocumentCenter/View/8664 Work on W. Hayes Ave. has started and will go through the beginning of October. The work on Hayes will cause some utility work S. 84 th St. from Lincoln to Hayes and in the intersection of 84 th and Lincoln that will cause traffic patterns to be detoured and/or changed. Patching work on 84 th and Lincoln has begun and continues. This work will go south to Hayes. Expect traffic congestion in the area.

2017 No. 3	Location	Type of Work	Summary of Work
	W. Rogers St. From S. 56 th St. to S. 60 th St. W. Madison St. from S. 60 th St. to S. 65 th St.	Underground Utility Construction and Roadway Reconstruction	<p>The work under this Contract consists of the reconstruction of both W. Rogers St. and W. Madison St. as a 29 foot wide, 7" concrete pavement, on a 5" dense graded base of crushed stone or crushed concrete; with concrete sidewalk, concrete driveway approaches, landscaping, storm sewer, storm sewer relay, sanitary sewer, sanitary sewer relay, water main, water main relay, building services, utility adjustments and all incidental items.</p>
	Comments		
			<p>Rogers - http://www.westalliswi.gov/DocumentCenter/View/8686</p> <p>Underground utility work on Rogers continues. Testing of the new water main is underway. Work will continue once testing is complete. After the water main is done, storm sewer work will start. There may be a few days of inactivity to allow other utilities to do work.</p> <p>Madison - http://www.westalliswi.gov/DocumentCenter/View/8687</p> <p>Work on the storm sewer will start up again. This is the last of the utility work to be done. Then, grading and paving work will begin.</p> <p>The City DPW is working on adjacent streets in preparation for new street lights in the area. <u>Street lights in the area will be turned off on July 18th. Crews will begin work on the new system immediately and sections of lights will be back in service as soon as possible.</u></p> <p>All work will be done and the road will be re-opened in late October.</p> <p>Because of the large amount of underground utility work going on, the streetlights in the neighborhood will be off until WE Energies and the City's Contractor are out of the areas where the fragile, old system is.</p>

	S. 57th St. From W. National Ave. to W. Lapham St.	Underground Utility Construction and Roadway Reconstruction	The work under this Contract consists of the reconstruction of S. 57th St. as a 30 foot wide, 7" concrete pavement, on a 5" dense graded base of crushed stone or crushed concrete; with concrete sidewalk, concrete driveway approaches, landscaping, sanitary sewer relay, water main relay, building services, utility adjustments and all incidental items necessary to complete the work.
			Comments
			http://www.westalliswi.gov/DocumentCenter/View/8764 Underground utility work on S. 57 th St. has begun. All the work is scheduled and the road will be re-opened by the end of October. The new sanitary sewer work has started and will continue for the next few weeks. No water service shut offs are scheduled. But because of the existing utilities' age, emergency situations may arise.

2017 No. 7	Location	Type of Work	Summary of Work
	Various Locations where the City of West Allis has previously replaced the utility-owned portion of the service line	Replacement of Private Lead Service Lines	<p>The work under this contract is generally described as the replacement of private Lead Service Lines (LSL) at locations where the City of West Allis has previously replaced the utility-owned portion of the service line with one inch diameter copper pipe. The replacement of the privately-owned portion of the LSL shall be from the curb stop to the interior water meter. Work may include, but is not limited to, the procurement of plumbing permits, scheduling the installation with the property owner, traffic control, erosion control, pavement saw cutting, excavation, installation of a new copper service line utilizing trenchless technology (City approval is required for open cut installation), abandonment of the LSL, reconnection to the interior water distribution piping, and backfilling the excavations. The Contractor shall coordinate with the City of West Allis Water Utility for water meter replacement. Restoration of concrete sidewalk and driveway will also be performed by the Contractor along with any other incidental items necessary to complete the work.</p> <p>The City reserves the right to increase or reduce the number of installations of LSL replacements based on the available grant funds remaining.</p>
			Comments
			<p>http://www.westalliswi.gov/DocumentCenter/View/8826</p> <p>Work will be performed all summer and through end of November.</p> <p>Work is being done on S. 60th St. (900, 1100, 1700, 1800, 2100 blocks) now and the contractor intends to work west through the City. The next section of work will be done on 57th and 58th streets. This schedule is subject to change as the contractor's and residents' needs dictate.</p> <p>Some No Parking signs and Lane Closures on S. 60th St. will be put in place to make room for the construction.</p> <p><i>The contractor will be contacting residents individually. Specific schedules at each address will be determined by the contractor after speaking with each property owner.</i></p>
