WEST ALLIS & WEST MILWAUKEE HEALTH DEPARTMENT UPDATES

The West Allis Health Department has partnered with the Department of Public Works to put digital traffic signs in two high traffic locations (Greenfield Ave & 98th and 68th & National). The signs serve as a reminder and reinforcement to stay home to help West Allis and West Milwaukee stay healthy.

ARE WE FLATTENING THE CURVE?

Hospitalized COVID-19 Positive Patients in Milwaukee County

Data Source: Milwaukee County Health and Human Services

Yes, Safer at Home is working. The Wisconsin Department of Health Services reports that social distancing has flattened the curve and resulted in fewer cases, hospitalizations, and deaths. Milwaukee County Hospitalization data mirrors statewide data showing a flattened curve. This allows the local health care system to treat COVID-19 positive patients without crisis care.

STATE AND FEDERAL UPDATES

Wisconsin is moving from Safer at Home to **Badger Bounce Back**. This plan is based off federal and CDC guidelines for states reopening safely. The Badger Bounce Back is Wisconsin's plan to decrease COVID-19 cases and deaths and increase capacity in the health care system so that a phased reopening of businesses is possible. The plan has **six** criteria for reopening: 1 & 2) a reduction in cases and in symptoms reported over an extended period of time, 3) hospitals capacity to treat patients without crisis care, 4) robust testing programs, 5) proper personal protective equipment (PPE) for health and safety workers, and 6) effective contact tracing. For more information visit: <https://www.dhs.wisconsin.gov/covid-19/prepare.htm>

At the West Allis Health Department, we are helping Wisconsin **bounce back** by doing **contact tracing** for all confirmed and suspected COVID-19 West Allis and West Milwaukee residents to control the spread of the virus.

PRACTICE PREVENTION
