COVID-19 BY THE NUMBERS

Date Updated
07/22/2020

Data Source:
Wisconsin Department of Health Services

NEGATIVE
Coronavirus Cases (State)
764,630

POSITIVE
Coronavirus **Confirmed Cases** (State)
44,847

Terminology change:
Positive Test Results... is now CONFIRMED CASES

COVID-19 BY THE NUMBERS terminology has changed starting in the July 22, 2020 version of the COVID-19 Weekly Summary Report.

To lessen confusion and better align data with state and county reports **the 'Positive Test Results' section of the Weekly Report has been renamed to 'Confirmed Cases'.**

Confirmed cases indicates the number of unique people who received a positive test result for COVID-19. If someone gets tested twice, and receives two positive COVID-19 test results, the total number of confirmed cases will increase by only one, not two.

The data has not changed. Only the label for the data has changed. All previous data listed in the Positive Test Results section of the WAWM Weekly Summary Report reflects total confirmed cases which is the number of unique positives not cumulative positive test results.

MILWAUKEE COUNTY UPDATES

COVID-19 TESTS FROM 7/3/20 TO 7/17/20

JURISDICTION	# OF TESTS GIVEN (+/-)	% OF TESTS	% POSITIVE
CUDAHY	654	1%	10% (+2%)
FRANKLIN	1296	3%	9% (+2%)
GREENDALE	530	1%	8% (+2%)
GREENFIELD	1860	4%	8% (0%)
HALES CORNERS	303	1%	8% (+1%)
MILWAUKEE	28157	63%	9% (-1%)
NORTH SHORE	4648	10%	3% (-2%)
OAK CREEK	1247	3%	9% (+2%)
SAINT FRANCIS	379	1%	7% (+2%)
SOUTH MILWAUKEE	807	2%	9% (+2%)
WAUWATOSA	2260	5%	5% (0%)
WEST ALLIS	2229	5%	9% (+1%)

PERCENTAGE OF POSITIVE TESTS INCREASING IN SUBURBAN MILWAUKEE MUNICIPALITIES

In the last two weeks, **the percentage (%) of positive test results** in relation to all tests administered **is rising in West Allis** and surrounding Milwaukee County suburban municipalities. When compared to data throughout the pandemic, **suburban municipalities seem to be trending slightly upward.** In West Allis the overall percent positive is around 8% but in the last two weeks it has risen slightly to 9%.

While percentage differences are small, the overall upward trajectory in percentage (%) of positive cases in suburban areas is concerning.

Additionally, this is interesting because it is in contrast to the trend seen in the city of Milwaukee. The city of Milwaukee experienced a slight decrease in percentage (%) of positive tests in the last two weeks.
